PROFESSIONAL SUMMARY

Software developer with a BSc Honours in Information Technology (Software Engineering) from Eduvos. Built and deployed a full-stack fleet management web application (Next.js, TypeScript, PostgreSQL, Prisma) that replaces a spreadsheet-based workflow for a fleet, backed by automated unit and end-to-end tests. Completed a full-stack development internship and delivered university projects in e-commerce and mobile/REST API development. Seeking an internship, graduate or junior developer role; available immediately, remote or Gauteng-based.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL, PHP, HTML5, CSS3, Kotlin (university project)

Frameworks & Libraries (project experience): React, Next.js, Node.js, Tailwind CSS, Bootstrap, jQuery, Django, Prisma ORM, NextAuth.js

APIs & Databases: REST APIs, PostgreSQL, MySQL, relational database design, normalisation, query optimisation

Testing & Tools (project experience): Vitest, Playwright, CI/CD, Git, GitHub, Vercel, Microsoft Excel and Office

Engineering Concepts: OOP, SDLC, Agile/Scrum basics, data structures and algorithms, systems analysis and design, debugging, network security fundamentals, encryption

PROJECTS

Nita Travels Fleet Management System Live site | GitHub

Technologies: Next.js, TypeScript, PostgreSQL, Prisma, Tailwind CSS, NextAuth.js, Vitest, Playwright

- Designed and developed a full-stack web application to replace an Excel-based workflow, with vehicle, transaction, repair, mileage, service, insurance, financial and analytics modules for a nine-vehicle fleet, saving time and reducing manual data-entry errors.
- Designed the PostgreSQL schema with Prisma and centralised business and financial logic; implemented authentication, input validation, a responsive and accessible UI, and application-security measures.
- Migrated and cleaned historical data from the original spreadsheet using Python scripts, and reconciled the seeded totals against the source workbook.
- Built reporting features including interactive charts, filterable and sortable transaction tables, and CSV export.
- Wrote unit tests (Vitest) and end-to-end tests (Playwright), set up a CI/CD workflow, and deployed the application to Vercel.

E-Commerce Web Application University project, 2025

Technologies: HTML, CSS, JavaScript, PHP, MySQL

- Individually designed and developed a responsive e-commerce platform with user login and shopping cart features.
- Integrated front-end interfaces with a MySQL database through PHP for dynamic data management, maintaining data accuracy and integrity through structured database interactions.

Mobile Application & Web Services Integration University project, 2025

Technologies: Kotlin, Python, REST APIs

- Developed a mobile application integrated with backend web services for real-time data exchange.
- Designed secure user authentication and data validation processes.
- Built and tested API endpoints to ensure reliable communication between the app and backend systems.

EXPERIENCE

Part-Time Data Entry / System Support, Krisha Gems April 2026 – Present

- Developed Excel-based fleet management and student accommodation management systems; later rebuilt the fleet system as the Nita Travels web application.
- Maintain accurate business records and support structured data updates and administrative tasks.

Full Stack Development Intern, BWS December 2025 – January 2026

- Completed a full-stack development internship, working independently with HTML, CSS, JavaScript, jQuery, Bootstrap and React on the front end and Python with Django on the back end.

EDUCATION

Bachelor of Science Honours in Information Technology (Software Engineering) 2025

Bachelor's Degree of Science in Information Technology (Software Engineering), Eduvos 2024

Matric, Parktown Boys' High School 2020
